

NASA SSERVI EDIA Focus Group

Your Enthusiastic Group Leader

JA Grier

‘If it’s worth doing, it’s worth overdoing.’

Hello and glad to be here!

- Welcome
- Introductions
- Announcements
- Reminders
- And all that there ...

Meeting Schedule

- Currently, every other Friday at 1pm Eastern Time.
- Days coming up we definitely need to miss? US Thanksgiving, etc.?
- Please put any thoughts about meeting time, day, and cadence in the chat box and I'll review them after the meeting.
- If you need more time, send me an email by COB Wed, Oct 1.

Planning

- Review where we are – what else do we need to do to benchmark our current status relative to EDIA understanding, action, initiatives?
- What resources/meetings/thoughts might be shared with the group? Please put in chat and I'll collect. (Or if you need more time, email.)
- I envision this group as a place where members go for support, ideas, training themselves, teaching others, benchmarking/celebrating achievements, and as a community modelling best practices for our whole profession. This means it isn't static, but always evolving.

Thinking

- Think of one specific, concrete objective you would like to see met in your local situation. Make it something small, within reach.
- Think of one specific, concrete objective you would like to see met in the Lunar science and exploration community (and related) as a whole. Think big!
- Think of a person or topic you'd like to see as a speaker.
- Think of one thing you'd really like to see happen in/about this group.

Here's mine! I'd love for us to have some formal evaluation to help guide and validate our progress.

Doing!

- I love thinking and planning, but I'd like to focus the most on doing!
- What training do people need? What do we want to share? What do we need help with right now?
- How do we achieve our objectives, big and small? How will we know when we've achieved them? What does success look like?
- My objective is to change the nature of how the lunar exploration community fundamentally approaches itself as a human organization, and as a human endeavor. I want to make the changes that bring EDIA, ethics, compassion, and humanity into every aspect of what we do.

Epilogue

- What great stuff is happening/just happened, that we missed?
Meetings, workshops, trainings, and more?
- How can we keep our focus, energy (spoons), and priorities set on EDIA? What can this group do?
